

Power knot system Prosafe

Item No. 900250504

- Installation with heavy-duty eyelet
- The adapters ensure quick anchoring of a wheelchair in a motor vehicle
- The power knot critically stabilizes the wheelchair design, e.g. in rear-end collisions
- Operator errors when anchoring the wheelchair are impossible
- The lap belt is firmly attached to the adapter and is thus already anatomically correctly worn before setting off
- A diagonal shoulder belt can be worn
- A wheelchair headrest is possible
- Advantages of installation with a heavy-duty eyelet include the increased power reserve upwards and greater flexibility in using various belt systems

Technical Data

Order number	900250504
Drum brake	No

Seat height	- cm
Width between armrest	0 cm
